

DANLY "CAGE STOPPER" END CAP

-  An alternative method to attach the ball bearing cage to a **DANLY** ball bearing guide post
-  The CAGE STOPPER is attached to a standard catalog **DANLY** guide post with a provided socket head cap screw
-  The CAGE STOPPER attaches to the guide post allowing the ball bearing cage to rotate when not in the preloaded position
-  The CAGE STOPPER is a good option when cage travel required is more than what is available with our traditional **DANLY** ball bearing cages

Socket Head Cap Screw Included

Guide Pin Diameter	1"	1-1/4"	1-1/2"	1-3/4"	2"	2-1/2"	3"
